

EXCESS FLOW VALVES

Peoples provides and maintains safety measures that protect your home and neighborhoods from unexpected changes in natural gas flows. One of those measures is an Excess Flow Valve (EFV) installed on new and renewed gas lines that supply gas to homes and some businesses. The device is designed to automatically shut off the flow of gas to your home if the natural gas line is damaged or broken.

As Peoples installs new gas pipelines throughout the system as part of the long-term infrastructure improvement plan, EFVs are installed on service lines that meet the operating conditions for an EFV. Eligible natural gas customers can request installation of an EFV onto the pipeline serving their home prior to Peoples planned implementation of the device; however, customers choosing this option would be responsible for the cost of installation with estimates beginning at \$2,100.

Log on to www.peoples-gas.com/pipeline-safety to learn more and request information. You can also call Peoples at 1-866-358-1735.

Hearing Impaired Customers Call 711 or 1-800-654-5988 TTY# 1-800-654-5984

Emergency Service Contact Info

Our emergency personnel are on duty to assist you **24 hours a day, 7 days a week.**

If you smell a natural gas odor, suspect a leak, or there is an explosion or fire, leave the area immediately and then call us at **1-800-400-4271.**

Please use this number only in an emergency.

1-800-400-4271

ASK TO SEE ID

Remember to always ask to see ID when a Peoples service employee visits your home.

In order to give you peace of mind, Peoples requires all of its customer service employees to wear photo identification. If you don't see it when one of our employees comes to your home, ask for it. Our employees will gladly show you their photo ID.

ALL Peoples employees carry an ID card with their name, photo and the Peoples logo. Also, look for a vehicle with the Peoples logo. **Please contact customer service at 1-800-764-0111 with any questions or concerns.**

YOU HAVE A CHOICE!

Did you know that Energy Choice is available to Pennsylvania utility customers? You do not have to purchase your natural gas from Peoples. The Energy Choice Program

provides you the option of purchasing your natural gas from a state approved supplier. Visit My Account/Understand My Bill/Shop for Gas at peoples-gas.com for additional details, or visit the Pennsylvania Gas Switch website, www.pagasswitch.com, for a list of Natural Gas Suppliers and current offers.

Peoples Gas and the Pittsburgh Pirates are partnering to offer a special ticket discount to Peoples Gas consumers on **SATURDAY, MAY 27th**, when the Pirates take on the New York Mets!

Please log on to www.pirates.com/peoplesgas to learn more about the discounts available and use the Coupon Code: **PEOPLES GAS**.

CROSS BORES

DEFINED: A cross bore is defined as the intersection of an existing underground utility or underground structure by a second utility installed using trenchless technology. This results in an intersection of the utilities, compromising the integrity of either or both utility or underground structure.

X Why Looking for Cross Bores is Important:

In rare cases, a gas pipeline could cross through a sewer pipe. If a plumber unknowingly strikes a gas line while cutting through a sewer blockage, natural gas could enter the sewer system. We want to prevent this from happening.

X Why Utility Lines Can Cross Through Sewer Lines:

When a new utility line (gas, electric, telephone, or cable television) needs to be installed in an urban area, it's very common for utility providers to dig horizontally underground (called directional boring). Since this installation method does not involve digging a trench, it avoids damage to sidewalks, patios, landscaping, and existing utility lines marked by 811 Call Before You Dig. However, the directional bore may unintentionally penetrate an existing sewer, drain or conduit.

X Cleaning Out Sewers Could Cause a Hazardous Situation:

This can happen when sewer laterals are cleaned using mechanical purging equipment (roter). This equipment has the ability to damage buried utilities. Collapsed sewer walls can also cause the roter equipment to be misdirected outside of the sewer, bringing the equipment dangerously close to other buried utilities.

Be safe. If you have a sewer blockage, please ask your plumber to always assume that obstructions could involve a cross bore. For more information or with any concerns, please contact Peoples at 866-863-6266, or e-mail us at damage_prevention@peoples-gas.com. You can also visit peoples-gas.com/crossbores.aspx for more information on safety precautions.

KEEP METERS CLEAR

Please remember that your natural gas meter must be accessible to read in case of emergency. Keep a three-foot clearance in front of your meter with grass and bushes trimmed back so the dials and safety valve are visible. **You can keep yourself and our meter readers safe this spring and summer by following these simple guidelines:**

- **Keep bushes** and poisonous plants trimmed back so the dials are visible to read. If we can't get close enough to read the meter, we will estimate your bill.
- **Call 811** to have underground utilities marked before digging.
- **Do not drape** hoses on or tie pets to the meter.
- **Plant trees, shrubs and plants** far enough away for future growth to allow space for routine and/or emergency maintenance work, and to prevent roots from damaging your gas service line.
- **Do not obstruct** the meter or regulator (if applicable) with boxes, vehicles, a deck, or other equipment which would impact the ability to service the meter.
- **Be careful** when mowing or weed-whacking around the meter.
- **Do not attempt** to service or maintain a meter yourself.

What's That Smell?

Although the natural gas delivery system is extremely safe, it is not infallible. Leaks do occur on occasion, but they usually can be detected:

If you smell a natural gas odor or suspect a leak, leave the area immediately and call our emergency number, **1-800-400-4271**.

BY SMELL

Because the gas is odorless, a sulfur-based odorant is added to give it a rotten-egg smell that warns of its presence. Be alert for this odorant or any petroleum smell.

BY SIGHT

Escaping gas affects the nutrients in soil, so discolored soil or dead vegetation near a pipeline may indicate a leak.

BY SOUND

Natural gas leaks may make a hissing or a high-pitched whistling noise.
