

WATER VAPOR CONTENT: EQUITABLE GAS DIVISION

ALLOWABLE WATER VAPOR LEVEL (#/MMSCF) VS. LOCATION

1. Producer meters connected to Equitable Gas Division's pipelines north of Creighton Compressor will be subject to 40#/mmscf water vapor standard.
2. Producer meters connected to Equitable Gas Division's pipeline south of Creighton Compressor will be subject to 20#/mmscf water vapor standard.

Peoples reserves the right to require more stringent water vapor standards in limited and specific situations where Peoples has determined through water vapor testing that the water vapor levels at identified production meter points are affecting customer service or creating operational issues.
